REPORT  
OF  
DIRECTOR OF FINANCE

1943

937509

UNITED STATES DEPARTMENT OF AGRICULTURE  
OFFICE OF BUDGET AND FINANCE  
WASHINGTON, D. C.

December 15, 1943.

Hon. Claude R. Wickard,  
Secretary of Agriculture,

Hon. Marvin Jones,  
War Food Administrator,

Sirs:

I respectfully submit the report of the Office of Budget and Finance for the fiscal year ended June 30, 1943. Due to wartime conditions, the report is confined to statistical and financial information concerning the funds of the Department of Agriculture. In keeping with the intent and provisions of Section 102, Public Law 96, 78th Congress, the report has not been printed, and a copy has been placed on file for public inspection.

The work of the Office has been redirected during the year to meet organizational and program changes within the Department, and to discharge more effectively the increased budgetary and fiscal responsibilities which have grown out of the Department's expanded activities in the production and distribution of agricultural commodities and food products. The Office has concentrated its efforts on such essential matters as developing and executing plans for financing programs of work, facilitating operations having budgetary or fiscal aspects, assuring effective and economical expenditure of funds in a regular manner, and evaluating and reporting on the effectiveness of work programs in relation to past, current, and proposed expenditures. These activities have been performed with the objective of maintaining budgetary and fiscal administration throughout the Department on a level that will afford the maximum of assistance in its general management and operation.

Sincerely,

  
Director of Finance

UNITED STATES DEPARTMENT OF AGRICULTURE  
ANNUAL REPORT OF THE DIRECTOR OF FINANCE, 1943

Summary Explanation of Tables

Total funds available to the Department of Agriculture for the fiscal year 1943, excluding capital funds of corporations under the jurisdiction of the Department, were \$4,497,751,659. Of this amount, \$3,236,847,086, or 72%, were supplemental appropriations and allocations made available for special war work \$1,260,904,573, or 28%, were funds available for regular activities of the Department, which are now substantially redirected for war work. Total obligations incurred against these funds amounted to \$3,097,583,185.

Table 1 shows, in summary form, the funds available during the year to each bureau, agency, or office, and the total obligations incurred against such funds.

Table 2 reports, in summary form, and by subappropriation items, funds appropriated, and administrative expenses and borrowings authorized, in appropriation acts for the fiscal years 1942, 1943, and 1944.

Table 3 shows funds available to the Department for special war work from supplemental appropriations and allocations for the fiscal years 1941, 1942, and 1943. These funds are summarized by categories of special war work and by sources. The special war projects for which the funds were appropriated or allocated are shown in detail by bureaus or agencies.

Table 4 indicates the sources of funds and authorizations made available to the Department for the fiscal years 1942, 1943, and 1944. The amounts for 1944 are limited, however, to funds and authorizations made available by the Agricultural Appropriation Act, 1944, and do not include those made available during the year. The sources of funds are grouped by (a) the Agricultural Appropriation Act, (b) permanent, annual, indefinite, and special appropriations, (c) supplemental and deficiency appropriations, and (d) other funds, including balances brought forward from funds of prior years, trust funds, transfers from other agencies and working funds, corporate administrative funds authorized for expenditure by appropriation acts, authorizations to borrow from the Reconstruction Finance Corporation, collections and reimbursements.

Table 5 shows Treasury receipts in connection with the Department of Agriculture activities during fiscal year 1943 and collections on loans made from funds borrowed from the Reconstruction Finance Corporation. It excludes receipts of corporations administered or supervised by the Department, as such receipts are shown in the annual reports of the respective corporations. Of the total receipts amounting to \$321,284,738. General Fund receipts available to the Treasury for general fund purposes were \$46,120,374, Special Fund receipts available to the Department pursuant to various legislative authorizations and for other purposes were \$25,780,706, Trust Fund receipts available for expenditure by the Department, as trustee, for specified purposes were \$96,288,636, and collections of principal and interest on loans for payment to the Reconstruction Finance Corporation were \$153,096,022.

Estimated obligations for research work by bureaus or agencies for the fiscal years 1932-1944 are shown in Table 6. For comparability, adjustments have been made in the amounts reported in prior years to give effect to transfers of research work incident to organizational changes.
